

October 2020

Dear Valued Supplier,

Viasat Inc. must ensure compliance with environmental laws and regulations. Regulations are constantly changing around the world requiring further product material information; EC 1907/2006 REACH, Waste Framework Directive 2008/98/EC (SCIP), 2011/65/EU and Addendum (EU) 2015/863) (RoHS), Biocide Regulation 528/2012, Persistent Organic Pollutants (POPS) Regulation 2019/1021 are a few examples. In addition, customer requirements like International Aerospace Environmental Group (IAEG), National Aerospace Standards (NAS411-1), and Military contracts are requiring Viasat to find ways to reduce supplier requests and churn. Viasat is requesting Full Material Disclosures (FMDs) from suppliers to meet these increasing regulatory and customer requirements. Utilizing FMDs allows Viasat to better analyze regulatory changes; Viasat has experienced up to 70% reduction in supplier requests for additional environmental information on select complex product certification efforts.

Viasat has engaged IHS Markit, a worldwide leader in technical content services, to assist us in collecting environmental compliance information. The data is being gathered from valued suppliers and your authorized distributors for components and materials which Viasat purchases or specifies in our product designs. **The data provided will remain confidential if required.**

Your company is an important supplier to Viasat. We are seeking your cooperation in providing the requested information as quickly and completely as possible. The content data for your products is essential for Viasat to determine the continued use of your products.

Please provide the requested information to IHS Markit as quickly as possible, preferably within 2 weeks of this request. Should you have general Viasat specific enquiries about this project please contact Compliance-ProductEnvironmental@viasat.com or Tim Killian at tim.killian@viasat.com.

Direct all clarification and/or technical questions regarding this request to the IHS contact indicated in the accompanying email.

We greatly appreciate your cooperation.

Regards,

Tim Killian

Manager, Environmental Engineering, Product Design, QA
