March 15, 2022

Dear Valued Supplier:

L3Harris Technologies, Inc. is a global aerospace and defense products and technology provider. As such, L3 Aviation Products, Inc. ("L3AP"), a division of L3Harris, is required to comply with applicable Environmental Compliance Analysis and Reporting (ECAR) regulations.

Specific to these ECAR regulations, our customers require documented analysis of, and reporting on, substances comprising L3AP products delivered to these entities. ECAR regulation variants that may be imposed on L3AP products include, but are not limited to, one or more of the following:

- REACH SVHC's
- RoHS Directive 2015/863/EU
- NAS-411
- SCIP
- TSCA
- Euratom
- EU Biocidal Products Regulation
- EU Critical Raw Materials
- Conflict Minerals
- California Proposition 65
- Conformité Européenne (CE) Mark Certification of Applicable Products

To ensure L3AP is able to provide such substance analysis reporting to our customers, we have engaged IHS Markit, a worldwide leader in technical content services, to perform this work on behalf of L3AP. As a valued supplier of parts and/or material to L3AP, L3AP both requests and expects your full cooperation in providing Full Material Disclosure (FMD) information requested by IHS Markit pursuant to L3AP ECAR in a reasonably timely fashion, nominally within two weeks of receipt of the information request.

Should you have general questions about this matter, please contact Adam Reuscher at adam.reuscher@l3harris.com.

Please direct all clarifications and/or technical questions regarding this request to the IHS Markit contact indicated in the accompanying email.

We greatly appreciate your cooperation.

Regards,

Adam D. Reuscher
