

February 2023

Dear Valued Supplier:

Thank you for being an important supplier to Hanwha Systems.

Hanwha Systems has engaged IHS Markit, now a part of S&P Global—a worldwide leader in technical content services ([spglobal.com](http://spglobal.com)), to assist us in collecting life cycle information on parts we purchase from you or your authorized distributors. We require this information, three times each year, to help us plan for the continued manufacturing and support of our products.

Please provide the following part information using the accompanying spreadsheet:

1. Part Status (active/discontinued/EOL (end of life)/etc.)
2. LTB (last time buy date; when applicable)
3. Replacement Part (for obsolete or EOL parts; when applicable)
4. EOL or LTB Notice (actual document; when applicable)

Please provide the requested information to IHS Markit as quickly as possible—preferably within one week of receipt of this request.

Should you need clarification or have technical questions regarding this request, please contact the IHS Markit representative specified in the accompanying email.

If you have any questions, please don't hesitate to contact the Hanwha Thales Project Manager:

> JaeSung Lee, [js730.lee@hanwha.com](mailto:js730.lee@hanwha.com) +82 10-4182-7419

Thank you for your assistance in this important planning task.

Regards,

<Signature Requested>
