

In my case in my path (in red), the `modelsim_ase` folder didn't appear in the quartus installation folder.

So, I installed modelsim separately and inserted the right path (in green). this in my case, but I think this may vary depending on the case, what I understood is that the path must be of type

C:\SoftwareWhitModelsimOrModelsim\softwareVersion\modelsim_ase\win32aloem

Orange → variable path

Black → fixed path
