Webinar Overview: New features available in the Intel® Integrated Performance Primitives (Intel® IPP) 7.0 beta library, including:

- ✓ Intel® AES-NI optimizations for cryptography.
- ✓ Additional optimizations for the 256-bit AVX instruction set.
- ✓ New data compression support for lzopack.
- ✓ Improved data compression performance.
- ✓ Microsoft* Visual Studio 2010 integration.
- ✓ New JPEG-XR (HD Photo) codecs.
- ✓ Up to 6x speedup for the UIC JPEG codec on 8-core systems.

This webinar will cover new features in the IPP 7.0 beta and performance improvements in the library; including measured performance improvements for the Intel® IPP cryptography functions on processors based on the latest Intel microarchitecture known as Westmere.

Title: *Intel® IPP 7.0 Beta available now – an introduction to new features*
Date: Wednesday, June 23, 2010
Time: 9:00 AM - 10:00 AM PDT

After registering you will receive a confirmation email containing information about joining the Webinar.

All live attendees may submit questions and participate in live polls.
